The Journal of Cell Biology
Volume 131, Number 6, Part 1, December 1995

Commentary
1361 A cell biological perspective on genome research.
J. R. McIntosh and R. R. West

Regular Articles
1365 Chromatin conformation and salt-induced compaction: Three-dimensional structural information from cryoelectron microscopy.
J. Bednar, R. A. Horowitz, J. Dubochet, and C. L. Woodcock

1377 Sac1p mediates the adenosine triphosphate transport into yeast endoplasmic reticulum that is required for protein translocation.
P. Mayinger, V. A. Bankaitis, and D. I. Meyer

1387 Anterograde and retrograde traffic between the rough endoplasmic reticulum and the Golgi complex.
J. C. Stinchcombe, H. Nomoto, D. F. Cutler, and C. R. Hopkins

1403 Misfolded major histocompatibility complex class I molecules accumulate in an expanded ER-Golgi intermediate compartment.
G. Raposo, H. M. van Santen, R. Leijendekker, H. J. Geuze, and H. L. Ploegh

1421 Caveolin cycles between plasma membrane caveolae and the Golgi complex by microtubule-dependent and microtubule-independent steps.
P. A. Conrad, E. J. Smart, Y.-S. Ying, R. G. W. Anderson, and G. S. Bloom

1435 Rab 7: An important regulator of late endocytic membrane traffic.
Y. Feng, B. Press, and A. Wandinger-Ness

1453 Pay32p of the yeast *Yarrowia lipolytica* is an intraperoxisomal component of the matrix protein translocation machinery.
R. K. Szilard, V. I. Tioorenko, M. Veenhuis, and R. A. Rachubinski

1471 Studies of the interaction between titin and myosin.
A. Houmeida, J. Holt, L. Tskhovrebova, and J. Trinick

1483 Actin filaments in yeast are unstable in the absence of capping protein or fimbrin.
T. S. Karpova, K. Tatchell, and J. A. Cooper

1495 Ponticulin plays a role in the positional stabilization of pseudopods.

1507 Cytoplasmic dynein binds dynactin through a direct interaction between the intermediate chains and p150^Glued^.
K. T. Vaughan and R. B. Vallee

1517 The *Chlamydomonas* kinesin-like protein FLA10 is involved in motility associated with the flagellar membrane.
K. G. Kozminski, P. L. Beech, and J. L. Rosenbaum

1529 Fission yeast cell morphogenesis: Identification of new genes and analysis of their role during the cell cycle.
F. Verde, J. Mata, and P. Nurse

1539 A localized elevation of cytosolic free calcium is associated with cytokinesis in the zebrafish embryo.
D. C. Chang and C. Meng

1547 An amino-terminal extension is required for the secretion of chick agrin and its binding to extracellular matrix.
A. J. Denzer, M. Gesemann, B. Schumacher, and M. A. Ruegg

1561 Adequate connexin-mediated coupling is required for proper insulin production.

1573 Hepatocyte growth factor/scatter factor induces a variety of tissue-specific morphogenic programs in epithelial cells.

Contents continued

Cover picture: The micrograph shows *Schizosaccharomyces pombe* mutants, stained with Calcofluor to visualize the cell wall, which are defective in cell shape and polarity. These mutants identify 19 independent genes with different morphogenetic functions during the cell cycle. See the related article in this issue by Verde et al., 1529–1538.
Massive programmed cell death in intestinal epithelial cells induced by three-dimensional growth conditions: Suppression by mutant c-H-ras oncogene expression.
J. Rak, Y. Mitsuhashi, V. Erdos, S.-n. Huang, J. Filmus, and R. S. Kerbel

Surface attachment of *Salmonella typhimurium* to intestinal epithelia imprints the subepithelial matrix with gradients chemotactic for neutrophils.
B. A. McCormick, P. M. Hofman, J. Kim, D. K. Carnes, S. I. Miller, and J. L. Madara

α₂ Macroglobulin receptor/Ldl receptor-related protein(Lrp)-dependent internalization of the urokinase receptor.
M. Conese, A. Nykjær, C. M. Petersen, O. Cremona, R. Pardi, P. A. Andreasen, J. Gliemann, E. I. Christensen, and F. Blasi

Regulation of CD44 binding to hyaluronan by glycosylation of variably spliced exons.
K. L. Bennett, B. Modrell, B. Greenfield, A. Bartolazzi, I. Stamenkovic, R. Peach, D. G. Jackson, F. Spring, and A. Aruffo
Nonrandom gene organization: Structural arrangements of specific pre-mRNA transcription and splicing with SC-35 domains.
Y. Xing, C. V. Johnson, P. T. Moen, Jr., J. A. McNeil, and J. Bentley Lawrence

Dynamic localization of RNase MRP RNA in the nucleolus observed by fluorescent RNA cytochemistry in living cells.
M. R. Jacobson, L.-G. Cao, Y.-L. Wang, and T. Pederson

Nup120p: A yeast nucleoporin required for NPC distribution and mRNA transport.
J. D. Aitchison, G. Blobel, and M. P. Rout

Nuclear pore complex clustering and nuclear accumulation of poly(A)⁺ RNA associated with mutation of the Saccharomyces cerevisiae RAT2/NUP120 gene.
C. V. Heath, C. S. Copeland, D. C. Amberg, V. Del Priore, M. Snyder, and C. N. Cole

The GLFG repetitive region of the nucleoporin Nup116p interacts with Kap95p, an essential yeast nuclear import factor.
M. K. Iovine, J. L. Watkins, and S. R. Wente

Characterization of a cis-Golgi matrix protein, GM130.

In vitro reconstitution of cytoplasm to vacuole protein targeting in yeast.
S. V. Scott and D. J. Kliionsky

Vesicle accumulation and exocytosis at sites of plasma membrane disruption.
K. Miyake and P. L. McNeil

Calcium-regulated exocytosis is required for cell membrane resealing.
G.-Q. Bi, J. M. Alderton, and R. A. Steinhardt

Dominant negative effect of cytoplasmic actin isoform proteins on cardiomyocyte cytoarchitecture and function.
P. von Arx, S. Bantle, T. Soldati, and J.-C. Perriard

A highly divergent γ-tubulin gene is essential for cell growth and proper microtubule organization in Saccharomyces cerevisiae.
S. G. Sobel and M. Snyder

Synapsin I deficiency results in the structural change in the presynaptic terminals in the murine nervous system.

Structure of synaptotygrin (p29) defines novel synaptic vesicle protein.
K. Stenius, R. Janz, T. C. Südhof, and R. Jahn

Endocytic depletion of L-MAG from CNS myelin in quaking mice.
L. Bö, R. H. Quarles, N. Fujita, Z. Bartoszewicz, S. Sato, and B. D. Trapp

A neuron-specific isoform of brain ankyrin, 440-kd ankyrin, targeted to the axons of rat cerebellar neurons.
M. Kunimoto

The tyrosine kinase substrate eps15 is constitutively associated with the plasma membrane adaptor AP-2.
A. Benmerah, J. Gagnon, B. Bégue, B. Mégarbané, A. Dastry-Varsa, and N. Cerf-Bensussan

V-src kinase shifts the cadherin-based cell adhesion from the strong to the weak state and β catenin is not required for the shift.
H. Takeda, A. Nagafuchi, S. Yonemura, S. Tsukita, J. Behrens, W. Birchmeier, and S. Tsukita

Targeted disruption of CD44 in MDAY-D2 lymphosarcoma cells has no effect on subcutaneous growth or metastatic capacity.
M. H. E. Driessens, P. J. M. Stroeken, N. F. Rodriguez Erena, M. A. van der Valk, E. A. M. van Rijthoven, and E. Roos

Cover picture: Adult cardiomyocytes were injected as beating cells with an expression plasmid containing γ-cytoplasmic actin provided with an epitope tag. After further incubation, beating stopped and the cell structures were analyzed. The epitope was stained with specific antibody and visualized with RITC (red) while myomesin served as a marker for assembled sarcomeric M bands (green). The actin organization in the transfected cell is changed by the expression of the cytoplasmic actin isoform. See related article in this issue by von Arx et al., 1759-1773.
The assembly of integrin adhesion complexes requires both extracellular matrix and intracellular rho/rac GTPases.
N. A. Hotchin and A. Hall

A role for phosphatidylinositol 3-kinase in the regulation of β1 integrin activity by the CD2 antigen.

The L1 adhesion molecule is a cellular ligand for VLA-5.
M. Ruppert, S. Aigner, M. Hubbe, H. Yagita, and P. Altevogt

P-selectin must extend a sufficient length from the plasma membrane to mediate rolling of neutrophils.

Collagen and collagenase gene expression in three-dimensional collagen lattices are differentially regulated by α1β1 and α2β1 integrins.
O. Langholz, D. Röckel, C. Mauch, E. Kozlowska, I. Bank, T. Krieg, and B. Eckes
