Commentary
1 Cell crawling: First the motor, now the transmission.
S.R. Heidemann and R.E. Buxbaum

Regular Articles
5 Homologous chromosome pairing in Drosophila melanogaster proceeds through multiple independent initiations.

21 Yeast nuclei display prominent centromere clustering that is reduced in nondividing cells and in meiotic prophase.
Q.-w. Jin, E. Trelles-Sticken, H. Scherthan, and J. Loidl

31 Major binding sites for the nuclear import receptor are the internal nucleoporin Nup153 and the adjacent nuclear filament protein Tpr.
S. Shah, S. Tugendreich, and D. Forbes

51 Golgi vesiculation and lysosome dispersion in cells lacking cytoplasmic dynein.
A. Harada, Y. Takei, Y. Kanai, Y. Tanaka, S. Nonaka, and N. Hirokawa

61 Cargo selection by the COPII budding machinery during export from the ER.
M. Aridor, J. Weissman, S. Bannykh, C. Nuoffer, and W.E. Balch

71 Pan1p, yeast eps15, functions as a multivalent adaptor that coordinates protein–protein interactions essential for endocytosis.
B. Wendland and S.D. Emr

85 Dyamin-mediated internalization of caveolae.
J.R. Henley, E.W.A. Krueger, B.J. Oswald, and M.A. McNiven

101 Dynamin at the neck of caveolae mediates their budding to form transport vesicles by GTP-driven fission from the plasma membrane of endothelium.
P. Oh, D.P. McIntosh, and J.E. Schnitzer

115 Apical plasma membrane proteins and endolyn-78 travel through a subapical compartment in polarized WIF-B hepatocytes.
G. Ihrke, G.V. Martin, M.R. Shanks, M. Schrader, T.A. Schroer, and A.L. Hubbard

135 Apical vesicles bearing inositol 1,4,5-trisphosphate receptors in the Ca²⁺ initiation site of ductal epithelium of submandibular gland.

143 The 13-kD FK506 binding protein, FKBP13, interacts with a novel homologue of the erythrocyte membrane cytoskeletal protein 4.1.

155 Three-dimensional structure of Acanthamoeba castellanii myosin-IB (MIB) determined by cryoelectron microscopy of decorated actin filaments.

163 Pericentrin and γ-tubulin form a protein complex and are organized into a novel lattice at the centrosome.

175 Rho guanosine triphosphatase mediates the selective stabilization of microtubules induced by lysophosphatidic acid.
T.A. Cook, T. Nagasaki, and G.G. Gundersen

187 A new member of the Rho family, Rnd1, promotes disassembly of actin filament structures and loss of cell adhesion.

199 ZO-3, a novel member of the MAGUK protein family found at the tight junction, interacts with ZO-1 and occludin.
J. Haskins, L. Gu, E.S. Wittchen, J. Hibbard, and B.R. Stevenson

Contents continued

Cover picture: High-resolution immunofluorescence image of centrosome (yellow) stained with antibodies to pericentrin and microtubules (red) stained with antibodies to α-tubulin. See related article in this issue by Dictenberg et al., 163–174.
Linking integrin $\alpha_6\beta_4$-based cell adhesion to the intermediate filament cytoskeleton: Direct interaction between the $\beta_4$ subunit and plectin at multiple molecular sites.
G.A. Rezniczek, J.M. de Pereda, S. Reipert, and G. Wiche

The Ig superfamily cell adhesion molecule, apCAM, mediates growth cone steering by substrate–cytoskeletal coupling.
D.M. Suter, L.D. Errante, V. Belotserkovsky, and P. Forscher

Activation of distinct $\alpha_5\beta_1$-mediated signaling pathways by fibronectin’s cell adhesion and matrix assembly domains.
D.C. Hocking, J. Sottile, and P.J. McKeown-Longo

Processing of laminin-5 and its functional consequences: Role of plasmin and tissue-type plasminogen activator.
L.E. Goldfinger, M.S. Stack, and J.C.R. Jones

Association between the rat homologue of CO-029, a metastasis-associated tetraspanin molecule and consumption coagulopathy.
C. Claas, S. Seiter, A. Claas, L. Savelyeva, M. Schwab, and M. Zöller

The tyrosine kinase p56$^{lck}$ mediates activation of swelling-induced chloride channels in lymphocytes.
A. Lepple-Wienhues, I. Szabò, T. Laun, N.K. Kaba, E. Gulbins, and F. Lang

Dynamic interaction of PTP$\mu$ with multiple cadherins in vivo.

A putative catenin–cadherin system mediates morphogenesis of the Caenorhabditis elegans embryo.
M. Costa, W. Raich, C. Agbunag, B. Leung, J. Hardin, and J.R. Priess
