Rapid Communications

1623 Newly synthesized G protein of vesicular stomatitis virus is not transported to the cell surface during mitosis. G. Warren, C. Featherstone, G. Griffiths, and B. Burke

1629 Under physiological conditions actin disassembles slowly from the nonpreferred end of an actin filament. L. Coluccio and L. G. Tilney

Use of antipeptide antibodies to demonstrate external orientation of the NH₂-terminus of the low density lipoprotein receptor in the plasma membrane of fibroblasts. W. J. Schneider, C. J. Slaughter, J. L. Goldstein, R. G. W. Anderson, J. D. Capra, and M. S. Brown

1648 In vitro rapid organization of endothelial cells into capillary-like networks is promoted by collagen matrices. R. Montesano, L. Orci, and P. Vassalli

1653 Fibronectin promotes epithelial migration of cultured rabbit cornea in situ. T. Nishida, S. Nakagawa, T. Awata, Y. Ohashi, K. Watanabe, and R. Manabe

Perspectives

1321 Nuclear RNA-protein interactions and messenger RNA processing. T. Pederson

Review

Regular Articles

1339 Assembly polypeptides from coated vesicles mediate reassembly of unique clathrin coats. S. Zarembo and J. H. Keen

1348 Analysis of muscle protein expression in polyethylene glycol-induced chicken:rat myoblast heterokaryons. S. F. Konieczny, J. B. Lawrence, and J. R. Coleman

1356 Regionalization of transmembrane glycoproteins in the plasma membrane of boar sperm head as revealed by fracture-label. A. P. Aguas and P. Pinto da Silva

1365 An efficient method for introducing defined lipids into the plasma membrane of mammalian cells. G. van Meer and K. Simons

1375 Trifluoperazine, a calmodulin antagonist, inhibits muscle cell fusion. D. Bar-Sagi and J. Prives

1381 Isolation of stable mouse cell lines that express cell surface and secreted forms of the vesicular stomatitis virus glycoprotein. R. Z. Florkiewicz, A. Smith, J. E. Bergmann, and J. K. Rose

1396 Aggregates of acetylcholine receptors are associated with plaques of a basal lamina heparan sulfate proteoglycan on the surface of skeletal muscle fibers. M. J. Anderson and D. M. Fambrough

1412 Biochemical studies of the excitable membrane of Paramecium tetraurelia. IX. Antibodies against ciliary membrane proteins. L. Eisenbach, R. Ramanathan, and D. L. Nelson

1429 Phosphorylation of keratin and vimentin polypeptides in normal and transformed mitotic human epithelial amnion cells: behavior of keratin and vimentin filaments during mitosis. J. E. Celis, P. M. Larsen, S. J. Fey, and A. Celis

1435 Mitogenic polypeptide of the mammalian seminiferous epithelium: biochemical characterization and partial purification. L. A. Feig, M. Klagesbrun, and A. R. Blevie

CONTENTS CONTINUED ON REVERSE OF THIS COVER
High-resolution three-dimensional views of membrane-associated clathrin and cytoskeleton in critical-point-dried macrophages. J. Aggeler, R. Takemura, and Z. Werb

Calcium-mediated changes in gap junction structure: evidence from the low angle x-ray pattern. P. N. T. Unwin and P. D. Ennis

A rat monoclonal antibody reacting specifically with the tyrosylated form of α-tubulin. I. Biochemical characterization, effects on microtubule polymerization in vitro, and microtubule polymerization and organization in vivo. J. Wehland, M. C. Willingham, and I. V. Sandoval

A rat monoclonal antibody reacting specifically with the tyrosylated form of α-tubulin. II. Effects on cell movement, organization of microtubules and intermediate filaments, and arrangement of Golgi elements. J. Wehland and M. C. Willingham

Immunocytochemical localization of the main intrinsic polypeptide (MIP) in ultrathin frozen sections of rat lens. P. G. FitzGerald, D. Bok, and J. Horwitz

Adhesion of cells to polystyrene surfaces. A. S. G. Curtis, J. V. Forrester, C. McInnes, and F. Lawrie

Fibronectin-mediated binding and phagocytosis of polystyrene latex beads by baby hamster kidney cells. D. D. McBee and F. Grinnell

Ultrastructure of Reichert's membrane, a multilayered basement membrane in the parietal wall of the rat yolk sac. S. Inoué, C. P. Leblond, and G. W. Laurie

Reappearance of β-adrenergic receptors after isoproterenol treatment in intact C6-cells. C. Hertel and M. Staehelin

Developmental regulation of Dictyostelium discoideum plasma membrane proteins. O. Prem Das and E. J. Henderson

Immunocytochemical localization of lysosomal β-galactosidase in rat liver. P. M. Novikoff, N. F. La Russo, A. B. Novikoff, R. J. Stockert, A. Yam, and G. D. Le Sage

Antibodies to a nuclear protein are localized in the nucleolus after red blood cell-mediated microinjection. F. C. Bennett, H. Busch, M. A. Lischwe, and L. C. Yeoman

Ultrastructural localization of calceoquin in rat skeletal muscle by immunoferritin labeling of ultrathin frozen sections. A. O. Jorgensen, A. C. -Y. Shen, K. P. Campbell, and D. H. MacLennan

Intracellular and transcellular transport of secretory component and albumin in rat hepatocytes. E. S. Sztul, K. E. Howell, and G. E. Palade

Rings of membrane sterols surround the openings of vesicles and fenestrae, in capillary endothelium. N. Simionescu, F. Lupu, and M. Simionescu

Membrane association of a 36,000-dalton substrate for tyrosine phosphorylation in chicken embryo fibroblasts transformed by avian sarcoma viruses. K. Radke, V. C. Carter, P. Moss, P. Dehazya, M. Schliwa, G. S. Martin

An actin-depolymerizing protein (depactin) from starfish oocytes: properties and interaction with actin. I. Mabuchi

ASCB PLACEMENT SERVICE NOTICES

INFORMATION FOR SUBSCRIBERS

SUBSCRIPTIONS—The basic subscription price per year (two volumes, six issues each) for institutions and individuals is $250. Students are eligible for the reduced rate of $125. Members of The American Society for Cell Biology may obtain the Journal for $100 through the Society (addressed to Dr. Robert L. Trelstad, Secretary, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814). (Please add $32 for airmail surcharge to all European subscriptions.) Single copies are sold at $21. Subscriptions, payable in advance, start with the first issue of the calendar year.

Payments and inquiries about membership in the American Society for Cell Biology should be addressed to Dr. Robert L. Trelstad, Secretary, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814.

All other inquiries about subscriptions and back issues should be addressed to the Order Service of The Rockefeller University Press, 1230 York Avenue, New York 10021.

Remittances should be made by check or money order payable to The Rockefeller University Press and addressed to Post Office Box 5108, Church Street Station, New York 10249. All checks must be drawn on U. S. banks.

Claims for nonreceipt of issues will be honored when received within 3 months of mailing for U. S. A. subscribers, 6 months for foreign subscribers.

MICROFORM—Subscriptions and back copies from Vol. 1 on, are available in microfiche and microfilm through University Microfilms, 300 North Zeeb Road, Ann Arbor, MI 48106.
